Govt receives financial bids for IDBI Bank stake sale

HARSH KUMAR
New Delhi, 6 February

The government on Friday received financial bids for its strategic disinvestment of IDBI Bank, the Department of Investment and Public Asset Management (Dipam) said in an official statement on X.

"Financial bids have been received for the strategic disinvestment of IDBI Bank. They will be evaluated as per the prescribed procedure," Dipam said, without disclosing further details.

The development assumes significance as the Union Budget for 2026-27 has pegged the disinvestment target at around ₹80,000 crore under miscellaneous capital receipts, which include the sale of shares in public-sector undertakings

The move comes as Union Budget for FY27 pegged the disinvestment target at around ₹80,000 crore

(PSUs) and asset monetisation. This comes after the government fell short of its budgeted disinvestment target of about ₹47,000 crore in FY26, revising it sharply downward to ₹33,837 crore in the Revised Estimates.

The Centre and Life Insur-

ance Corporation of India together hold a 95 per cent stake in IDBI Bank, of which 60.72 per cent is on the block. Officials have maintained that asset monetisation and disinvestment would remain key pillars of the government's capital receipts strategy. "The intent is that asset monetisation and disinvestment should be seen together as part of this strategy, which enhances or increases the participation and efficiency of the private sector," he had said.

He added that of around 50 firms for which in-principle approvals have been obtained for disinvestment or closure, about half of the transactions have already been completed.

In January 2023, Dipam had received multiple expressions of interest for IDBI Bank. The prospective buyers have already been granted security clearance by the Ministry of Home Affairs and cleared under the 'fit and proper' criteria after evaluation by the RBI.

that combines disinvestment and closure of PSUs to enhance private sector participation and efficiency. "Disinvestment and closures should be seen together as part of this strategy, which enhances or increases the participation and efficiency of the private sector," he had said.

He added that of around 50 firms for which in-principle approvals have been obtained for disinvestment or closure, about half of the transactions have already been completed.

IAF to get free hand to integrate weapons on 114 new Rafales

BHASWAR KUMAR
New Delhi, 6 February

The Indian Air Force (IAF) will have full "unilateral" authority to integrate weapons of its choice, including made-in-India munitions, on board the additional 114 Rafale combat aircraft that India is actively considering purchasing from French aerospace major Dassault Aviation, defence sources said on Friday.

They added that the final deal would be cost-competitive by international standards, despite incorporating a significant push for local manufacturing and maintenance.

"The additional Rafales will be from a vastly improved version compared to the 36 acquired for the IAF under the 2016 deal," one of the sources added.

The new jets will be of the latest "F4 standard" and are planned to be upgraded to the under-development "F5 standard" in due course. According to Dassault, the future Rafale F5 jets will feature capabilities that will allow them to remain operational beyond 2060 and will be optimised to operate alongside unmanned combat aircraft. The Indian Navy has also placed orders for 26 marine variants of the aircraft.

"We will have unilateral capability, meaning a free hand, to integrate weapons on board the additional jets. This will be part of the negoti-

ations," said one of the sources, adding that this would allow indigenous munitions, such as the Astra beyond-visual-range air-to-air missile, to be integrated on board the French jets.

They added that another key element of the negotiations would be ensuring that the software-defined radio (SDR) on board the jets is capable of faster "cross-talk" — enabling what is known in military parlance as net-centric operations — with all current and future IAF platforms, regardless of origin. While the IAF's existing fleet, comprising largely Russian and Western-origin jets alongside indigenous platforms, is already capable of net-centric operations, the additional Rafales would do so more quickly and efficiently.

Though commercial negotiations are yet to begin, the sources said preliminary estimates suggest the per-unit cost of the jets would be lower than in deals signed by countries such as Germany, Italy, and Turkey for similarly capable aircraft. "The latest 4.5-generation aircraft, including their weapons package, cost upwards of \$240 million per unit. We are aiming for a lower figure, even after accounting for significant indigenous content through local manufacturing and localised maintenance, repair and overhaul," one of them said. "We will pursue tough negotiations from our end," they added.

India test-fires nuclear-capable Agni-3 missile off Odisha coast

India on Friday successfully test-fired nuclear weapons-capable Agni-3 ballistic missile from the Chandipur off Odisha coast, with a strike range of more than 3,000 kilometres, PTI officials said. The surface-to-surface missile was launched by the personnel of Strategic Forces Command (SFC) from a mobile launcher as part of a regular training exercise.

APPOINTMENTS

VACANCY ANNOUNCEMENT

The Tamilnadu Apex Skill Development Center for Healthcare, a Section 8 company is seeking a committed and competent

Managing Director

Qualification and Experience

- Degree in Healthcare or Social Work
- Minimum 15 years of experience (Skill Development sector highly preferable)
- Healthcare experience will be an advantage

Bid deadline of OALP-X auction extended

SHUBHANGI MATHUR

New Delhi, 6 February

The government has extended the bid submission deadline for the 10th round of Open Acreage Licensing Policy (OALP-X) by three more months to May 29, 2026, said Directorate General of Hydrocarbons (DGH).

The latest bid round was launched in February 2025 during India's flagship energy event India Energy Week (IEW) 2025 and was expected to end by July 2025. The deadline for OALP-X bid submission, however, has been extended for the fourth time since then.

DGH, the upstream regulator, did not specify the reason

for deadline extension. OALP-X is the largest bid round so far offering 25 blocks spread over thirteen sedimentary basins, covering an area of 182,000 sq km. The bid round mainly offers offshore blocks as out of 25 blocks, 12 blocks are in ultra deep-water, one in deep water, six blocks are in on-land and six blocks are in shallow

water areas. In an effort to boost exploration activities in India, the government introduced the Oilfields (Regulation and Development) Amendment Bill, passed by Parliament in March 2025, to offer ease of business and operations in the upstream sector and attract foreign players to invest in the country.
